## Mentored Lab™

### Proctored Classroom Learning –

- Ever wish more classes were guaranteed to run every month or even every other week?
- Ever wish you could take Technical Training without being out of the office for 3 to 5 full days at a time?
- Ever wish your training could be tailored to your unique needs - so you could spend your time learning just what you need to learn?
- Ever wish you could get all of the above benefits -- without losing the benefits of classroom training?

### Cyber Academy Mentored Lab Approach

We start with a pre-assessment of your current skills. This assessment allows you and your Cyber Academy Mentor to know exactly which strengths and weaknesses need to be addressed during the learning process. The customized training that follows is based on a one-on-one coaching relationship with the mentor, who is a Cyber Academy and/or a Microsoft Certified Trainer. This training includes multimedia presentations by additional certified instructors, the same courseware used in classroom training, plus a lab environment that allows you to work through the same labs, workshops and hands-on exercises used in our traditional Cyber Academy classroom setting. The Certified Cyber Academy Mentor provides you with one-on-one coaching throughout the entire process as your own “personal trainer.”

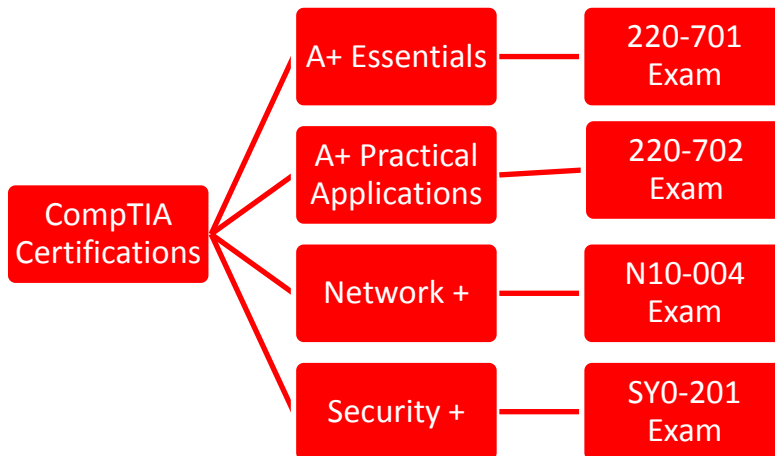

You learn at your own pace, so you can proceed quickly or slowly depending on the topic. Then, after completing each course, you may take a post assessment test to gauge your learning progress and readiness for certification exams, if desired. You may then move to the next course immediately or when convenient. Your schedule is almost infinitely flexible. You even can schedule your learning sessions in half-day units as your time permits.

Talk with your **Account Executive** today to learn more about our courses.

### Mentored Lab Dates Offered:

Mar	8-12	Mon-Fri
Apr	12-16	Mon-Fri
